GENERAL INFORMATION

SUPER-KEY LIQUID IRON is a proprietary blend of soluble micronutrient(s) and an organic complexing agent so as to enhance and maintain availability and accelerate uptake by crops.

SUPER-KEY LIQUID IRON is non-phytotoxic and can be applied foliar to most crops. It is recommended for use throughout the season in a program of multiple applications for greater efficiency. This provides a continuous supply of vital nutrients at or near the time they are needed most.

SUPER-KEY LIQUID IRON is environmentally safe, made with only "clean" raw materials free from heavy metal contamination.

DIRECTIONS FOR USE

SUPER-KEY LIQUID IRON can be added to most nitrogen solutions or fluid fertilizers and impregnated on dry blend fertilizer. It can be tank mixed with most pesticides. Always make a small-scale test to assure compatibility. It can be soil or foliar applied, broadcast or banded over the row and injected through irrigation systems.

CAUTION: DO NOT USE IN HIGH PHOSPHATE "STARTER" OR "POP-UP" FERTILIZER MATERIALS SUCH AS 10-34-0.

SUPER-KEY LIQUID IRON will disperse in water with minimal agitation. It serves as a buffer when used in tank mixes with pesticides. Follow the mixing sequence: 1. Water; 2. **SUPER-KEY LIQUID IRON**; 3. Pesticide.
